

# building today's *windows* with tomorrow in mind

## tomorrow's technology *today* setting industry standards

While many of today's windows have yet to meet the 2009 recommendations issued by Natural Resources Canada, not only is VWD up-to-date with current technology and standards, our windows are designed to meet standards yet to come!

At VWD, we're active members of industry associations and sit on numerous boards and other advisory committees. We are an integral part of the decision-making processes that are determining today what will be an industry requirement tomorrow. That's how we stay ahead of the game!

VWD's engineering staff ensures the highest standards of architectural strength and design elegance combined with superior insulation values and maximum light penetration.

Our computer-controlled highly-automated manufacturing facility, coupled with an on-site testing lab, allows VWD to maintain a consistency of quality in every window it builds. Other companies meet standards—VWD sets them.

As a consumer, you may be curious to know why more ENERGY STAR® registered dealers have chosen VWD than any other manufacturer in Canada for eleven consecutive years. The answer is simple. VWD manufactures windows *precisely* to Natural Resources Canada's specifications.

*delivery* marks a new beginning

Once your new VWD windows are installed, you'll begin to enjoy more comfort in your home. With decades of experience, VWD prides itself on maintaining a relationship with its dealers and the homeowners they serve – for life.

you can't fake *quality...* Any more than you can fake a good meal  
—WILLIAM S. BURROUGHS

After decades of manufacturing Windows For Life, VWD continues to keep its in-house testing facility current. Its rigorous testing, to CSA's highest standards of certification, allows VWD to comfortably stand behind its products.

tomorrow's  
technology  
*today*

Vinyl Window Design is proud to celebrate decades of setting standards in the window industry. VWD manufactures windows *precisely* to Natural Resources Canada's specifications. That could explain why more ENERGY STAR® registered dealers have chosen VWD than any other manufacturer in Canada for 11 consecutive years.

Other window manufacturers may meet standards—VWD sets them.

worth *hiding*  
The Ultra Casement Rolling Screen offers an unhindered, panoramic view from your window.

worth-the-paper *warranty*

VWD has stood behind its windows for almost three decades. Its Windows for Life™ Warranty proves that your satisfaction is very important.

Decades of Innovation  
*at a Glance*

*certified and  
qualified*

VWD products are certified by CSA, IGMA, NFRC and AAMA. Our products are ENERGY STAR® certified and we are a Window Wise approved manufacturer. VWD is a member of SAWDAC and of Fenestration Canada (CWDMA). For further certification details, please refer to: [www.vinylwindowdesigns.com](http://www.vinylwindowdesigns.com) or call 1-800-668-4820.

Your authorized distributor is:

glass, glass, *glass*

*divide*  
and decorate!

To add a traditional look to your new windows, you can choose Simulated Divided Lites (SDLs) — profiles added to the inside and outside of the window. The result? All of the curb appeal on a reasonable budget.

### Casements and Awnings

The casement is the homeowner's 21st century window of choice. VWD brings you the most innovative and energy efficient version of this popular window. Even the most economical Plus Series window comes with a folding handle, spring-loaded screen and tamper-resistant concealed hinges.

*accessorize* with style

A wide variety of interior and exterior accessories are available to enhance the beauty and function of your windows. Snap on casings and rosettes are fully washable and can be instantly removed prior to painting or decorating your room's walls.

Our Truth Ultra Operating System adds beauty, elegance and simplicity and won't interfere with your drapes or blinds. Standard on Premium and Ultra Casements and Awnings.

R/U  
*insulated?*

*quiet, please*  
the sound of silence

- To most homeowners, R or U insulation value becomes meaningful when it translates to:
- Preventing heat loss in the winter.
  - Keeping heat outside in the summer.

Different applications may demand different low-e glass in certain areas of your home. Unlike most, VWD carries both to optimize your comfort level, as well as energy efficiency. Ask your dealer about our Custom Low-E glass packages.

The right combination of glass types, with the correct thicknesses can yield a reduction in sound transmission. The right air space between pieces of glass reduces transmission of noise. You'll love the sound of silence!

### Architectural Shapes

VWD products come in many different sizes and shapes. They have to. With nearly three decades of manufacturing replacement windows for thousands of heritage homes and tens of thousands of custom homes, VWD has the experience to complement the architectural expression of your home.

### Double and Single Hung

These traditional-styled windows are popular with homeowners wanting to maintain the architectural integrity of their home. Customize your options to obtain a clean look while you delight in the tilting of the operating sashes that make cleaning a breeze!

### Bays and Bows

Projecting bay and bow windows create the illusion of a room being larger than its floor space. Make creative use of this extra space by adding a window seat for the family bookworm or a place for your plants to bask in the sun. Bays and bows can be customized to build the look and functionality you desire.

### Double and Single Sliding

Popular for their large glass area, VWD's wide assortment includes the popular double tilt version and lift out models. Knowing that the key to a great tilt slider is superior drainage and a superior tilt-in function, VWD offers performance while providing you with an unobstructed view.

For discriminating tastes, 78 standard exterior colours in Enviro Coatings fit many different home styles.

some things  
are worth

*hiding*

The Ultra Casement Rolling Screen hides your screen from view when it's not required. The result? An unhindered, panoramic view from your window.

*foam* "warmware"

For people who really dislike winter, and offered as an option, polyurethane foam is injected into the frame of each window and expands. The result? Superior insulation and warmth.

get *smart...*

Another innovation from VWD designed to make your life easier. Separate locking and tilting functions are a thing of the past. Smart Locks allow you to both unlock and tilt in your sash with a single operation. Now that's smart.

**Stainless** Finally... a spacer system that just won't compromise

The ultimate in glass technology, the stainless spacer delivers the warm edge advantage while enhancing the structural integrity of the complete sealed unit system. You will not admire your VWD windows from across the room; you'll cozy up to them.

*see and hear*  
the difference

Diamond Premium Glass is 33% to 100% thicker than industry standards. Approximately 85% of your window is a sealed glass unit. Thicker glass reduces exterior noise; offers higher insulating value; is harder to break and withstands the pressure of high winds.

Diamond Premium
